

## Rockefeller University Mask Donation

2022/06/03

During 2020, through the connection of Steven Rockefeller III, Pondmoon has made the donation of surgical masks to help Rockefeller University and its affiliated healthcare facilities in its fight against COVID-19.

The donation comes in response to the *Mayor de Blasio's* appeal for donations of supplies to help the City's health care workers treat New Yorkers affected by COVID-19. In response to the global COVID-19 pandemic, The Rockefeller University has launched numerous studies aimed at better understanding the biology of the SARS-CoV-2 virus and developing interventions to prevent and treat infections.

To appreciate the support, Rockefeller University Senior Vice President for Development **Marnie Imhoff** invited Pondmoon team in June 2022 to visit and offered an exclusive tour of the campus including the Collaborative Reserve Center and the newly completed Stavros Niarchos Foundation-David Rockefeller River Campus.

As a residential and multifamily investor and asset manager, Pondmoon noticed the importance of health and wellness in the public space. Through its class-leading development portfolios that includes many LEED certified buildings, Pondmoon has been educating investment partners and tenants on the advantages of smart, healthier, sustainable living environment that utilizes solar panel, color-changing glasses and recycled ultra-purified water to help reduce the owning costs of commercial buildings and benefit the health and well-being of the people living in them.
